The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/757,129	Applicant(s) HARRINGTON, STEVEN J.	
	Examiner Scott A. Rogers	Art Unit 2625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, 11, 16, 21, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Maltz et al (US 5734802 A).

Referring to claims 1, 11, and 21:

Maltz et al disclose defining a finite set of document rendering intents (hue, saturation, and luminance of graphical and pictorial objects) as a basis for document rendering, expressing at least one desired document rendering strategy comprising a first combination of the document rendering intents (using a blend of look-up tables for color mapping), and associating the at least one desired document rendering strategy with at least one rendering decision associated with a document (decision based on whether image signal are outside the pictorial gamut). See abstract and col. 4, lines 37-67 and col. 5, lines 32-49.

Referring to claims 6, 16, and 26:

Maltz et al disclose identifying the finite set of document rendering intents (hue, saturation, and luminance of graphical and pictorial objects) at a rendering device, wherein a document rendering method is implemented by the rendering device for each of the document rendering intents (using one or a blend of the look-up tables for color mapping), and obtaining the associated desired document rendering strategy associated with the at least one rendering decision. See abstract and col. 4, lines 37-67 and col. 5, lines 32-49 (decision based on whether image signal are outside the pictorial gamut).

Claims 1, 6, 11, 16, 21, and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Balasubramanian et al (US 6744534 B1).

Referring to claims 1, 11, and 21:

Balasubramanian et al disclose defining a finite set of document rendering intents as a basis for document rendering, expressing at least one desired document rendering strategy comprising a first combination of the document rendering intents (using a blend of color mapping transforms), and associating the at least one desired document rendering strategy with at least one rendering decision associated with a document (decision based on where a pixel is located in the device or pictorial gamut). See abstract and col. 3, line 66 to col. 4, line 21, and col. 6, line 56 to col. 7, line 40.

Referring to claims 6, 16, and 26:

Balasubramanian et al disclose identifying the finite set of document rendering intents at a rendering device, wherein a document rendering method is implemented by the rendering device for each of the document rendering intents (using one or a blend of the color mapping transforms), and obtaining the associated desired document rendering strategy associated with the at least one rendering decision (decision based on where a pixel is located in the device or pictorial gamut). See abstract and col. 3, line 66 to col. 4, line 21, and col. 6, line 56 to col. 7, line 40.

Allowable Subject Matter

Claims 2-5, 7-10, 12-15, 17-20, 22-25, and 27-30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
